Date: Sep-24-2008

2.33 (b) DIRECT NCI ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

(b) Each research facility shall establish and maintain programs of adequate veterinary care that include;

(3) Daily observation of all animals to assess their health and well-being; Provided, however, That daily observation of animals may be accomplished by someone other than the attending veterinarian; and Provided, further, That a mechanism of direct and frequent communication is required so that timely and accurate information on problems of animal health, behavior, and well-being is conveyed to the attending veterinarian;

***There are several horses at the plasma pheresis unit that have hooves that need trimming. The hooves have become overgrown and have cracks. Overgrown hooves may lead to lameness. The hooves shall be properly trimmed at a frequency that will minimize cracks and protect the horses from lameness. Correct by Oct 31, 2008.

***Horse #AX1 at the BVD Unit is lame on her left foreleg. It was indicated that the horse was showing signs of lameness for a couple of days but there is no documentation to indicate any observations or recommendations. As of today the horse has not been examined by the Veterinarian. Daily observations should be recorded and findings communicated to the attending veterinarian in a timely manner. The horse shall be examined and records maintained documenting diagnosis and treatment. Correct by October 1, 2008.

3.1 (a) HOUSING FACILITIES, GENERAL.

(a) Structure; construction. Housing facilities for dogs and cats must be designed and constructed so that they are structurally sound. They must be kept in good repair, and they must protect the animals from injury, contain the animals securely, and restrict other animals from entering.

***The entry door into Kennel C has severe rust and corrosion at the bottom. There is a ceiling vent that has rust and is hanging from the ceiling on one side. Repairs shall be made to all surfaces to maintain structural soundness. Repair by December 30, 2008.

Inspection Report

3.130

WATERING.

If potable water is not accessible to the animals at all times, it must be provided as often as necessary for the health and comfort of the animal. Frequency of watering shall consider age, species, condition, size, and type of the animal. All water receptacles shall be kept clean and sanitary.

***The water trough in the alpaca enclosure at the BVD unit has an accumulation of sediment and an overgrowth of algae in it. Of the two troughs provided for the for draft horses at the unit, one of the troughs did not have a stopper and therefore contained no water and the other trough was very low on water. The troughs shall be cleaned and adequate potable water shall be provided at a frequency that will insure the health and well being of the animals. Correct by September 29, 2008.

3.131

(a)

SANITATION.

(a) Cleaning of enclosures. Excreta shall be removed from primary enclosures as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and to reduce odors.

***There is an excess accumulation of feces on the floor of the shelter in the alpaca enclosure. The feces are getting packed down from the alpaca walking on it. Excess accumulations of feces increase the risk of disease hazard. Excreta shall be removed from primary enclosures as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards. Correct by September 30, 2008.

3.131

(c)

SANITATION.

(c) Housekeeping. Premises (buildings and grounds) shall be kept clean and in good repair in order to protect the animals from injury and to facilitate the prescribed husbandry practices set forth in this subpart. Accumulations of trash shall be placed in designated areas and cleared as necessary to protect the health of the animals.

***There is excess overgrowth of brush in and around the deer enclosure at the old deer unit. The overgrowth inhibits the ability to inspect the enclosure fence and monitor its integrity. There are trees along the fence line and a large limb was observed hanging very closely over or possibly on the fence. Brush and tree limbs shall be cleared from the fence to prevent damage to the fence and maintain the deer securely within. Correct by October 30, 2008

NOTE: The grate flooring used in the dog runs in SRRC has been satisfactorily corrected.

2.31 (d) (1) (ii)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

<<IACUC review of activities involving animals. In order to approve proposed activities or proposed significant changes in ongoing activities, the IACUC shall conduct a review of those components of the activities related to the care and use of animals and determine that the proposed activities are in accordance with this subchapter unless acceptable justification for a departure is presented in writing. Further, the IACUC shall determine that the proposed activities or significant changes in ongoing activities meet the following requirements: The principal investigator has considered alternatives to procedures that may cause more than momentary or slight pain or distress to the animals, and has provided a written narrative description of the methods and sources, e. g., the Animal Welfare Information Center, used to determine that alternatives were not available;>>

The (b)(6), (b)(7)c did not provide a consideration for alternatives to procedures that may cause more than momentary or slight pain or distress to the animals in protocol 0809. A literature search using keywords animal and training and alternatives was included but no consideration for alternatives for the proposed potentially painful procedures, including bone marrow aspiration, was provided.

The IACUC shall conduct a review of animal use activities which shall include a consideration by the [redacted] for alternatives to any procedure which may cause more than momentary or slight pain or distress to the animals.

To be corrected prior to conducting further animal use activities on this protocol.

2.31 (e) (3)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

<<A proposal to conduct an activity involving animals, or to make a significant change in an ongoing activity involving animals, must contain the following: A complete description of the proposed use of the animals;>>

An IACUC approved protocol did not contain a complete description of the proposed use of the animals. In protocol 0809, there a numerous procedures listed as possibly being performed on a variety of species but there is no description for several of the procedures which include major survival surgery and bone marrow aspirates.

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

<<IACUC Functions. With respect to activities involving animals, the IACUC, as an agent of the research facility, shall:

2.31 (c)(1)--Review, at least once every six months, the research facility's program for humane care and use of animals, using title 9, chapter I, subchapter A--Animal Welfare, as a basis for evaluation;>>

The IACUC has not conducted a review of the research facility's animal care and use program since 11/16/07.

The IACUC shall review, at least once every six months, the research facility's program for the humane care and use of animals.

To be corrected by 8/15/08.

2.31 (c) (2)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

2.31(c)(2)--<<Inspect, at least once every six months, all of the research facility's animal facilities, including animal study areas, using title 9, chapter I, subchapter A--Animal Welfare, as a basis for evaluation; >>

The IACUC has not conducted an inspection of the research facility's animal facilities since 11/16/07.

The IACUC shall inspect, at least once every six months, all animal facilities used at the research facility.

To be corrected by 8/15/08.

Inspection Report

2.31 (c) (3)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

2.31(c)(3)--<<Prepare reports of its evaluations conducted as required by paragraphs (c)(1) and (2) of this section, and submit the reports to the Institutional Official of the research facility; Provided, however, That the IACUC may determine the best means of conducting evaluations of the research facility's programs and facilities; and Provided, further, That no Committee member wishing to participate in any evaluation conducted under this subpart may be excluded. The IACUC may use subcommittees composed of at least two Committee members and may invite ad hoc consultants to assist in conducting the evaluations, however, the IACUC remains responsible for the evaluations and reports as required by the Act and regulations. The reports shall be reviewed and signed by a majority of the IACUC members and must include any minority views. The reports shall be updated at least once every six months upon completion of the required semiannual evaluations and shall be maintained by the research facility and made available to APHIS and to officials of funding Federal agencies for inspection and copying upon request. The reports must contain a description of the nature and extent of the research facility's adherence to this subchapter, must identify specifically any departures from the provisions of title 9, chapter I, subchapter A--Animal Welfare, and must state the reasons for each departure. The reports must distinguish significant deficiencies from minor deficiencies. A significant deficiency is one which, with reference to Subchapter A, and, in the judgment of the IACUC and the Institutional Official, is or may be a threat to the health or safety of the animals. If program or facility deficiencies are noted, the reports must contain a reasonable and specific plan and schedule with dates for correcting each deficiency. Any failure to adhere to the plan and schedule that results in a significant deficiency remaining uncorrected shall be reported in writing within 15 business days by the IACUC, through the Institutional Official, to APHIS and any Federal agency funding that activity;>>

The last report of the IACUC's evaluation of the animal care and use program and facilities for animal use was updated on 3/22/07. The last facility inspection and program review was performed by the IACUC on 11/16/07.

The IACUC shall perform its evaluation of the animal care and use program and facilities at least once every six months with the reports of these evaluations updated at least every six months.

To be corrected by 8/31/08 following the inspection and program review scheduled by 8/15/08.

FACILITIES, GENERAL.

(a) Structural strength. The facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

***I observed a section of the roof on the back side of the lower barn that is sagging. One of the posts that support this section has been knocked down leaving no support for the joist. The boards that run crosswise directly beneath the roof between the posts in this section have separated leaving the roof sagging. In addition, there are support posts that have been chewed on by the goats. Some were half of their normal size. Patches were applied to some of the posts but their strength has been compromised. The boards applied at an angle to attach the support posts to the roof are separating from the roof on the front side of the structure allowing the barn to lean. The soundness of this barn is compromised. The structure shall be repaired or replaced to protect the safety of the animals housed within.

***There are old electrical boxes attached to the walls in the upper barn that are no longer in use. There are no supply wires attached but there are pieces of old wiring, nails, screws, etc., at a level that could allow the goats to come in contact with them and become injured or ingest pieces. All loose old wiring and objects shall be removed or the goats shall be prevented from access to them.

Note: Amended report for the 01/11/08 inspection report to remove the previous classification of the noncompliance as a "repeat".

FACILITIES, GENERAL.

(a) Structural strength. The facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

2.30 (a) (1) REGISTRATION.

(1) Each research facility other than a Federal research facility, shall register with the Secretary by completing and filing a properly executed form which will be furnished, upon request, by the AC Regional Director. The registration form shall be filed with the AC Regional Director for the State in which the research facility has its principal place of business, and shall be updated every 3 years by the completion and filing of a new registration form which will be provided by the AC Regional Director. Except as provided in paragraph (a)(2) of this section, where a school or department of a university or college uses or intends to use live animals for research, tests, experiments, or teaching, the university or college rather than the school or department will be considered the research facility and will be required to register with the Secretary. An official who has the legal authority to bind the parent organization shall sign the registration form.

***During this inspection I observed several documents indicating that the position of "Institution Official" may have changed. A letter was received at the USDA, APHIS, Animal Care, Eastern Regional Office from (b)(6), (b)(7)(c) on September 17, 2007 indicating that (b)(6), (b)(7)(c). On November 20, 2007 a letter was received from the (b)(6), (b)(7)(c) indicating that the (b)(6), (b)(7)(c).

(b)(6), (b)(7)(c) The facility is currently registered under the University. The semi-annual report of January, 2008 was sent to (b)(6), (b)(7)(c) though information on record indicated that (b)(6), (b)(7)(c).

(b)(6), (b)(7)(c) During our conversation today it is evident that further clarification must be made. Documentation shall be provided from the Chief Executive Officer to USDA, APHIS, Animal Care Eastern regional Office clarifying the information required in accordance with 9 cfr Sections 2.30 and 2.31. Correct by August 15, 2008.

FACILITIES, OUTDOOR.

<<...sufficient shade by natural or artificial means shall be provided to allow all animals kept outdoors to protect themselves from direct sunlight.>>

The outdoor housing facility for one bison did not have any means to provide protection from direct sunlight.

In order to prevent overheating or discomfort to the animals due to direct sunlight, sufficient artificial or natural shade shall be provided to animals housed outdoors.

To be corrected by 5/31/08.

3.127 (b)

FACILITIES, OUTDOOR.

<<Natural or artificial shelter appropriate to the local climatic conditions for the species concerned shall be provided for all animals kept outdoors to afford them protection and to prevent discomfort to such animals>>

The outdoor housing facility for one bison did not have either a natural or artificial shelter to protect the animal or to prevent discomfort from climatic conditions.

Natural or artificial shelter shall be provided for all animals kept outdoors to offer protection and prevent discomfort.

To be corrected by 5/31/08.

3.130

WATERING.

<<...All water receptacles shall be kept clean and sanitary.>>

The water receptacle for one bison had an accumulation of algae on the sides and bottom as well as algae floating in

FEEDING.

<<...Food receptacles shall be kept clean and sanitary at all times...>>

The food processor used for preparing a diet for bats was not clean or sanitary. There was a build-up of food debris on the blade and housing as well as rust on the blade. This can lead to contamination of food prepared with this processor and poses a health risk to the animals.

All food receptacles must be clean and sanitary at all times to protect the health and well-being of the animals.

To be corrected by 9/7/08.
